Letter of recommendation for Hyejeong Cheon

Feb.02, 2019

Dear Sir or Madam,

I am writing this reference at the request of Hyejeong Cheon. I have been working in the semiconductor industry for over 20 years. Hyejeong Cheon had been working at SK Hynix for 2 and half years (Jan. 2015 ~ Jul. 2017), and I was a project manager of the work group that she worked in.

On her process engineer in the semiconductor industry, she successfully brought lots of good experimental results in our workgroup. She devoted herself to diffusion process development for 3D NAND Flash device in our working group. At that time, she had a special strength in an analysis of the structural failure of semiconductor devices. I believe that her good knowledge of semiconductor device and skills from experience will be a great help to your research.

I have been very impressed by her positive and passionate attitude. I believe that she will be an extremely positive addition to your organization. And, I would highly recommend her for a doctoral program in your department. If you need any additional information, feel free to contact me at any time.

Sincerely,

KiHong Lee

Research Fellow

SK Hynix
